

Name: Ahmed Faseeh Akram

QUID: 202005685

My Personal Contribution

During the web development project phase 2, I was responsible for creating the Stats React page and designing its layout.

However, we encountered significant challenges in setting up and working with the database, which required meticulous problem-solving and collaboration to overcome. Despite these hurdles, our teamwork and dedication resulted in a successful implementation of the Stats page, enhancing the overall functionality and appeal of the project.
